REQUEST FOR PROPOSAL (RFP)

REFERENCE NUMBER: 07/KHEU/BTM/2/RFP/2025

TITLE: NETWORK INFRASTRUCTURE UPGRADE PROJECT – THE SUPPLY, DELIVERY, INSTALLATION, SETUP, CONFIGURATION, TESTING AND MAINTENANCE AT MA'HAD ISLAM BRUNEI, MINISTRY OF RELIGIOUS AFFAIRS

PROPOSAL SUBMISSION DEADLINE: TUESDAY, 4 NOVEMBER 2025, 2:00 PM

1. PROJECT OVERVIEW AND OBJECTIVES

Ma'had Islam Brunei, one of the key Arabic schools in Brunei Darussalam, is a core institution under the Ministry of Religious Affairs. Located in Tutong District, it caters to students from Year 5 to Year 11, preparing them for further studies in Arabic and Islamic disciplines while serving a specialised academic community with diverse operational and learning needs.

The school's network infrastructure has reached the end of its serviceable life and is no longer capable of meeting present or future requirements. Teaching and learning remain largely paper-based, with limited use of Microsoft 365 tools and occasional online assessments. The upgraded network is therefore intended to provide a reliable foundation for current operations while enabling phased digital adoption over the next ten (10) years.

This project will replace obsolete components with high-performance, energy-efficient hardware and deploy enterprise-grade wireless access points to deliver robust, campus-wide connectivity. The initiative forms part of the Ministry's ICT modernisation roadmap.

The primary objectives of this project are to:

- a. Improve network reliability and performance;
- b. Enhance security capabilities;
- c. Reduce operational costs through energy-efficient equipment;
- d. Establish a scalable infrastructure for future growth; and
- e. Minimise downtime during implementation.

2. SCOPE OF WORK

The successful vendor will be responsible for the comprehensive implementation of the network upgrade project, including:

- a. Supplying all network switches, racks, cabling, wireless access points, controllers, and accessories.
- b. Delivering all equipment to Ma'had Islam Brunei.
- c. Installing, configuring, and integrating all hardware and software according to Ministry requirements.
- d. Testing and verifying network performance.
- e. Providing training and knowledge transfer to Ministry and school IT staff.
- f. Delivering complete documentation for the installed solution.

- g. Providing ongoing maintenance and technical support.
- h. All deliverables (hardware, configuration, test results, as-builts, and knowledge transfer) shall be subject to formal User Acceptance Testing (UAT) and documentation acceptance by the Ministry prior to handover.

Detailed technical specifications and requirements are provided in **Appendix A**.

3. EVALUATION CRITERIA

Proposals will be evaluated based on the following criteria:

Criterion	Weight
Technical compliance and solution design	35%
Total cost of ownership (5-year life cycle)	30%
Vendor qualifications and experience	15%
Implementation approach and timeline	10%
Maintenance and support capabilities	10%

The Ministry is committed to obtaining the best value for money, not necessarily the lowest initial price. Proposals will be evaluated on their ability to meet the Ministry's requirements over the entire life cycle of the equipment.

4. QUALIFICATION REQUIREMENTS

Vendors must meet the following minimum requirements to be considered:

- a. **Eligibility:** Proposals are invited only from companies/contractors registered with the Government of His Majesty the Sultan and Yang Di-Pertuan of Brunei Darussalam.
- b. **Experience:** Demonstrated experience in implementing similar network infrastructure projects.

8. EVALUATION AND SELECTION PROCESS

- 9.1 The evaluation will follow a two-stage, two-envelope process to ensure fairness, transparency, and compliance with public sector procurement standards.

Conducted by an internal Evaluation Committee based on the following weighted criteria:

RASMI TIER 1A

REFERENCE NUMBER: 07/KHEU/BTM/2/RFP/2025 - NETWORK INFRASTRUCTURE UPGRADE PROJECT: THE SUPPLY, DELIVERY, INSTALLATION, SETUP, CONFIGURATION, TESTING AND MAINTENANCE FOR MA'HAD ISLAM BRUNEI, MORA

Evaluation Criterion	Weight
Technical compliance, performance, and solution design (including all Mandatory [M] specifications in Appendix A)	35%
Vendor qualifications, relevant certifications, and experience with similar public sector/educational wireless network projects	15%
Implementation approach, phased deployment plan, and timeline	10%
Maintenance and support capabilities, including defined SLAs and escalation procedures	10%

Only proposals that meet all **minimum technical requirements** and **Mandatory [M] specifications** in Appendix A, as well as **Qualification Requirements** in Section 5, will proceed to Stage 2.

9.3 Stage 2: Commercial Evaluation (Envelope B)

Only technically compliant proposals will be evaluated for price and value, based on:

Evaluation Criterion	Weight
Total Cost of Ownership (TCO) over a 5-year life cycle, inclusive of hardware, licences, support, and maintenance (initial 3-year term + optional Years 4 and 5)	30%

9.4 Overall Evaluation Scoring

Category	Weight
Technical (Stage 1)	70%
Commercial (Stage 2)	30%
Total	100%

Scoring Methodology:

- Each criterion is scored out of 100 and multiplied by its respective weight.
- Only vendors scoring $\geq 70\%$ in the Technical Evaluation will proceed to the Commercial Evaluation.
- The lowest-priced compliant vendor does not automatically win – the final award is based on the highest total score across both stages.
- The Procuring Entity may request clarifications on non-price information during evaluation; no changes to price or material aspects are permitted, consistent with the two-envelope approach.
